Tobacco usage is undergoing rather drastic changes — health —taxes — general economy of the nation — social acceptance — all pay a part of the change that's taking place. For example: last year cigar consumption was up 1.7 percent, an estimated 28 million pounds of tobacco was used to roll-your-own, the largest amount in 15 years, chewing tobacco poundage was down 1.6 percent and snuff was off one percent as it continues to decrease as it has since 1956.
